List of Contents

1	Fundamentals	1	4	Experiments with R_s compensation	35
1.1	The three-phase induction motor with squirrel-cage rotor	1	Experiment 1: Max. perm. BOOST of a three-phase induction motor	35	
1.1.1	The structure of the motor	1	Experiment 2: LED field of rotation	36	
1.1.2	The speed of the rotary field	2	Experiment 3: Direction of rotation	37	
1.1.3	Torque and slip	2	Experiment 4: Digital control signals of the frequency converter	38	
1.1.4	Characteristic points	3	Experiment 5: Maximum deviation	40	
1.1.5	Speed control	4	Experiment 6: Analog control signals of the frequency converter	42	
1.2	Static converter systems for speed regulation of the three-phase induction motor	7	Experiment 7: U/f characteristic	45	
1.2.1	General	7			
1.2.2	I-converter	7	5	Experiments with the power unit	47
1.2.3	U-converter	7	Experiment 1: Intermediate circuit voltage	47	
1.3	Digital Frequency Converter (Type 5261) from hps	10	Experiment 2: Effect of the brake chopper	48	
1.3.1	General	10			
1.3.2	Constructional features of the power unit	10	6	Experiments with the frequency control of a three-phase induction motor	51
1.3.3	Function principle of an inverter	11	Experiment 1: Field of rotation speed, idle speed and idle slip	51	
1.3.4	Constructional features of the control unit	14	Experiment 2: Frequency dependence of the idle current	55	
2	Commissioning and measuring technique	21	Experiment 4: Motor voltage depending on the PWM frequency	57	
2.1	Operation of the terminal	21	Experiment 4: Speed and slip in sin. PWM	59	
2.1.1	Error messages of the Digital Frequency Converter (Type 5261)	23	Experiment 5: Speed and slip in trapez. PWM	65	
2.2	The connection of a three-phase induction motor	24			
2.3	Speed control, clockwise/anticlockwise rotation of a three-phase induction motor	25	7	Experiments with acceleration and braking of a three-phase induction motor	71
2.4	LED rotating field and measuring points	25	Experiment 1: Acceleration of a three-phase induction motor without load	71	
2.5	Necessary accessories and measuring instruments	26	Experiment 2: Acceleration of a three-phase induction motor with load	75	
2.6	Safety instructions for handling the system	27	Experiment 3: Travel diagram with DFUwin	81	
3	The frequency converter software DFUwin	29	8	Experiments with the speed control with a three-phase induction motor	83
3.1	Software requirements	29	Experiment 1: Speed control independently of the load	83	
3.2	Hardware requirements	29	Experiment 2: Speed control with setpoint jump	86	
3.3	Software installation	29			
3.3.1	Installation under Windows 3.1x	29			
3.3.2	Installation under Windows 95	29			
3.4	The U/f diagram	30			
3.5	The travel diagram	33			

9	The synchronous machine	89	
9.1	Fundamentals	89	
9.1.1	Structure of the machine	89	
9.1.2	Operating behaviour as a motor	90	
9.1.3	Connecting the machine	92	
9.2	Experiments with the synchronous motor	93	
	Experiment 1: Max. perm. BOOST of a synchronous machine	93	
	Experiment 2: Acceleration of a synchronous motor without load	94	
	Experiment 3: Acceleration on load and sinusoidal PWM	98	
	Experiment 4: Acceleration on load and trapezoidal PWM	102	
	Solutions	S 1	
	Experiments with R_s compensation	S 1	
	Experiments with the power unit.	S 7	
	Experiments with the frequency control of a three-phase induction motor	S 9	
	Experiments with acceleration and braking of a three-phase induction motor	S 21	
	Experiments with the speed control with a three-phase induction motor	S 27	
	Experiments with the synchronous motor	S 29	
	Appendix	A 1	
	Formula and Abbreviations	A 1	
	Foils	F 1	
	Digital Frequency Converter (Type 5261)	F 1	
	Universal Power Supply (Type 2740)	F 2	
	Isolation Amplifier (Type 8630)	F 3	
	PID BOARD (Type 5120)	F 4
