Contents

1	Basic principles of photovoltaics	1
1.1	The sun, a gigantic source of energy	1
1.2	The structure of a solar cell	4
1.3	Types and manufacturing methods of solar cells	4
1.3.1	Mono-crystalline silicon solar cells	5
1.3.2	Multi-crystalline silicon solar cells	5
1.3.3	Amorphous silicon solar cells	6
1.4	Efficiency factors of solar cells	7
1.5	The light emitting diode as a photoelement	8
2	Measuring the radiation energy	10
2.1	Measuring methods	10
2.1.1	Thermal voltage	10
2.1.2	Photoelectric method	12
2.1.3	Spectrometer	13
2.1.4	Calorific method	13
2.2	Measuring method in the hps Photovoltaic System	14
2.2.1	Direct method	14
2.2.2	Indirect method	14
2.3	The term „Air Mass“	15
2.4	The term „Time“	
2.5	Direct and indirect radiation	18
3	Examination of solar cells	19
3.1	No-load voltage and short-circuit current at different illumination strengths	19
3.2	No-load voltage and short-circuit current in partially shadowed solar cell	21
3.3	Power characteristics of solar cells	23
3.3.1	Basic principles	23
3.3.2	Current, voltage, power, filling factor and efficiency of a mono-crystalline silicon solar cell	24
3.3.3	Current, voltage, power, filling factor and efficiency of a multi-crystalline silicon solar cell	26
3.4	Influence of temperature on short-circuit current and no-load voltage	28
3.4.1	Basic principles	28
3.4.2	Temperature influence on a mono-crystalline silicon solar cell	29
3.5	Influence of the radiation angle on the power of a solar cell	31
3.5.1	Basic principles	31
3.5.2	Power and short-circuit current at different inclination angles	34
3.5.3	Short-circuit current at different inclination and azimuth angles	36
3.6	Influence of dirt on the power of a solar cell	38

4	Linking solar cells in modules	39
4.1	Series circuit	39
4.2	Parallel circuit	42
4.3	Mixed circuit.....	44
4.4	Bypass diodes	46
4.4.1	Basic principles.....	46
4.4.2	Influence of shadowing on the short-circuit current.....	47
4.4.3	Voltage at a solar cell with shadowing	49
4.4.4	Proof of the effect of bypass diodes	50
4.4.5	Eliminating the hot spot effect by a bypass diode.....	51
4.5	String diodes.....	53
5	DC island systems	55
5.1	Load and consumer	55
5.1.1	General	55
5.1.2	Load adaptation	55
5.2	Energy stores.....	57
5.2.1	Basic principles.....	57
5.2.2	The energy store of the PHOTOVOLTAIC BOARD	59
5.2.3	Operating consumers on an accumulator	61
5.3	Discharge protection.....	62
5.4	Charging controller	63
5.4.1	Basic principles.....	63
5.4.2	Total discharge protection	64
5.4.3	Exercises	64

Solutions

Overhead-foils
