## List of Contents

|                                                                                 |    |                                                      |      |
|---------------------------------------------------------------------------------|----|------------------------------------------------------|------|
| <b>1. Introduction</b> .....                                                    | 1  | <b>4. Wire transmission</b> .....                    | 71   |
| 1.1 Fundamentals .....                                                          | 1  | 4.1 Fundamentals .....                               | 71   |
| 1.2 Notes on the measuring technology .....                                     | 2  | 4.2 Matching .....                                   | 72   |
| <b>2. Optical waveguide</b> .....                                               | 3  | 4.3 Noise sensitivity of a two-wire line .....       | 73   |
| 2.1 Fundamentals .....                                                          | 3  | 4.4 Noise sensitivity of a coaxial line .....        | 79   |
| 2.2 Power characteristics of transmit diodes .....                              | 13 | 4.5 Spurious emission of a wire transmission .....   | 81   |
| 2.3 Attenuation measuring on fibres .....                                       | 17 | <b>Solutions</b>                                     |      |
| 2.4 Attenuation at connection points .....                                      | 22 | 2. Optical waveguide .....                           | L 1  |
| 2.5 Transmission of AC voltage .....                                            | 28 | 3. Wireless transmission by infrared radiation ..... | L 15 |
| 2.6 Transmission of 2 analog signals in frequency<br>division multiplex. ....   | 32 | 4. Wire transmission. ....                           | L 21 |
| 2.7 Transmission of frequency-modulated signals ....                            | 37 | <b>Appendix</b>                                      |      |
| 2.8 Transmission of pulse-frequency modulated<br>signals .....                  | 39 | 1. Formula symbols .....                             | A 1  |
| 2.9 Transmission of a PCM signal .....                                          | 43 | 2. Equipment required for the experiments .....      | A 2  |
| <b>3. Wireless transmission by infrared radiation</b> .....                     | 51 | <b>Foils</b>                                         |      |
| 3.1 Fundamentals .....                                                          | 51 | MODULATION BOARD (Type 4280) .....                   | F 1  |
| 3.2 Spectral sensitivity of the infrared receiver .....                         | 54 | DEMODULATION BOARD (Type 4281) .....                 | F 2  |
| 3.3 Attenuation of the transmission line<br>(Law of Photometric Distance) ..... | 56 | TRANSMITTER BOARD (Type 4282) .....                  | F 3  |
| 3.4 Radiation characteristic of the transmit module ...                         | 58 | RECEIVER BOARD (Type 4283) .....                     | F 4  |
| 3.5 Transmission of AC voltage .....                                            | 62 | COAXIAL BOARD (Type 4284) .....                      | F 5  |
| 3.6 Transmission of frequency-modulated signals ....                            | 64 |                                                      |      |
| 3.7 Transmission of a digital signal in the<br>Modulated operating mode. ....   | 66 |                                                      |      |
| 3.8 Transmission of a PCM signal .....                                          | 68 |                                                      |      |
